

PRIME HD

HYDRATED CORTICAL MATRIX

Prime HD is pre-hydrated, ready-to-use, and provides outstanding handling characteristics

- Comprised of a proprietary formulation of elongated demineralized bone particles
- Pre-hydrated in a proprietary polysaccharide preservative
- Available in a convenient, ready-to-use hydrated state
- Unlike other grafts, Prime HD can be easily combined with biological fluids to enhance the overall biological properties of the graft
- Cohesive, moldable, with reliable wet field integrity
- >95% bone by volume
- Two-year shelf-life at ambient temperature

MTF's Aseptic Processing preserves inherent biologic properties that promote healing

Prime HD is aseptically processed, without exposure to harsh chemical agents or terminal irradiation, which preserves the natural biologic activity and endogenous growth factors that are critical to facilitating the bone healing process. Each lot of Prime HD is tested to confirm osteoinductive potential.

Partner with a processor that has spent over 30 years Honoring Donated Gifts

MTF Biologics is a global nonprofit and physician-led organization, headquartered in Edison, New Jersey. MTF Biologics has spent more than 30 years honoring donated gifts by developing innovative, effective allograft solutions to help people heal. From orthopedics to wound care to plastic and reconstructive surgery, MTF is a force in scientific progress and patient advocacy. Kolosis BIO partners exclusively with MTF for all tissue forms.
